Heavy Duty Grapples

When the work gets tough, Bestway Ag Heavy Duty Grapples get tougher. Forged with $\frac{1}{2}$ " high-strength tines set on $8\frac{1}{4}$ " spacing and armored with AR400 steel at every wear point, these grapples are engineered to bite harder, last longer, and dominate any job. Choose 72" or 84" — either way, you're running with the strongest grip in the field.

Light Duty Grapples

Light duty? Not here. Bestway Ag Light Duty Grapples redefine the class with unmatched build quality for tractors and skid steers up to 50HP. U.S.-made cylinders, AR400 steel everywhere it counts, reinforced clamp rods, and a massive 35" opening give you serious muscle in a compact package. Competitors can't touch it. This is light duty, the Bestway.
